

CERAMIC BELT CLEANER

***Tech Pro Plus newly designed Ceramic Belt Cleaner
is unlike any conventional cleaner!***

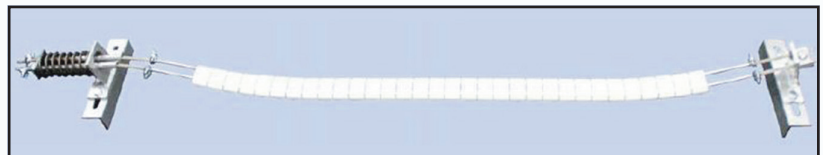

- Excellent cleaning performance of dry, block, wet powder, sticky or high temperature applications.
- Easy to install and adjust on site.
- High abrasion resistant blade edge maintains cleaning power over a longer period of time, with minimal maintenance.
- Ceramic tips closely contact the conveyor belt for better cleaning, even if the belt is worn or a crowned pulley is being used.

- There are 2 installation methods depending on the pulley width and diameter.
- V-type would be recommended for pulleys more than 150 cm belt width.

- Newly designed spring tensioned holders provide even easier installation.
- The wires become individually adjustable so that the ceramic tips can contact the belt more closely to improve cleaning efficiency.
