

SOLID-LUBE BEARINGS

Solid lubricated bearings trap lubrication in the bearing and block out contaminants to significantly extend bearing life.

- Solid lubricant bearings are lubricated-for-life and never require re-lubrication.
- The solid lubricant combines a micro-porous polymer with food grade USDAH1 approved oils and releases the right amount of lubricating oil to the bearing.
- Operating temperature -55°F (-48°C) to 215°F (101.6°C)

- No grease purge & no re-greasing
- Eliminate labor cost to re-grease
- Dramatically improve cleanliness
- Increase bearing life
- Seal out contaminants
- Reduce wash-down time
- USDA/FDA & HACCP friendly

Luff Industries Ltd.
235010 Wrangler Road
Rocky View, (Calgary) Alberta, T1X 0K3

TF: 1.888.349.LUFF (5833)
P: 403.279.3555
F: 403.279.5709

Luff Frames & Endcaps are clearly marked with SLB for Idlers that are equipped with solid lube bearings.
