

URETHANE DISC RETURN ROLLER

Up to 5 times the life of comparative rubber disc versions

- Luff's design eliminates costly downtime with up to 5 times the life of standard rubber disc return rolls.
- Self-cleaning design sheds excess debris, preventing material build-up and belt damage.
- Majority of disc wear occurs in the center due to material carry back, the polyurethane center discs are abrasion resistant and built for the most demanding environments and material handling applications.
- Urethane can operate in temperatures up to 100°C.
- Available in standard belt widths from 18" - 96".

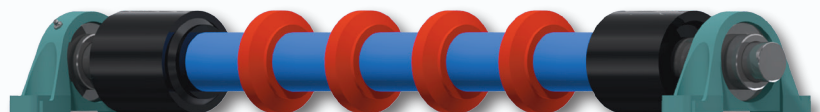

**Full 2 Year
Warranty**

Roll diameters available in 4", 5", 6" and 7"

Live Shaft

Luff's Live Shaft design provides customers with a larger shaft and pillow block bearings which reduces shaft deflection and can accept heavier loads.
