

Adjustable Frames

Compatible with All CEMA-Rated Idlers for Fast, Easy Height Adjustments

Adjust with Precision: Fully adjustable frame and end brackets allow movement from 0° to 45° for perfect positioning.

Ultimate Setup Flexibility: Allows for complete flexibility and versatility of idler set up along the entire conveyor belt.

Smooth Transitions, Made Easy: Easily manage and create smooth transition points by making small adjustments to the angle where required.

Reliable Belt Tracking: Maintain full belt-to-idler contact for improved alignment and reduced wear.

Custom Skirt Sealing: Dial in the exact angle needed to achieve a complete seal in skirted areas.
