

## Tool Free Belt Covers

Choose the cover that is lighter, safer, more efficient, environmentally friendly, and a true time and cost saver.

**Tool-Free Design:** Quick, safe installation and removal with no tools required, reduces maintenance time and labor costs.

**Durable Construction:** HDPE (white) or clear polycarbonate covers with corrosion-free galvanized or stainless steel hoops — long-lasting and maintenance-free.

**Flexible Coverage Options:** Available in full, 1/2, or 3/4 coverage, standard 4 ft sections; adaptable to any conveyor system.

**Built-In Visual Access:** Clear cover sections enable easy belt inspection without removal, which improves safety and monitoring.

**All-Weather Protection:** Shields belts and materials from UV, wind, and weather and extends equipment life and maintains performance.

**Enhanced Safety & Environmental Control:** Minimizes dust, noise, and exposure that protects workers and reduces environmental impact.

**Improved Material Handling:** Prevents belt edge lifting and enhances fugitive material shedding, keeping systems cleaner and more efficient.
