

## ***CBC Wing Pulleys***

**Built for Performance in Demanding Applications**

**High-Speed Performance:** Engineered with the advanced CFW CBC 4140 HTSR design for belt speeds over 400 FPM. Continuous belt contact reduces noise and vibration, delivering smooth, efficient operation.

**Superior Wear Resistance:** Equipped with High Abrasion Contact Bars for tough, heavy-duty environments. Special bar material extends pulley life and minimizes downtime.

**Enhanced Material Flow:** Integrated deflectors move material away from the center, reducing buildup and improving discharge across the conveyor.

**Proven Durability:** Field-tested: 500+ hours of operation in demolition recycling applications with minimal wear.

***Conveying Performance***
