

## CEMA C Idlers - 3400 Series

**Strength That Goes the Distance:** Luff's patented polymer endcap design delivers unmatched durability, sealing, and impact resistance, built to outperform in the toughest environments.

**Corrosion Protection from the Inside Out:** Every roller shell is fully dipped before assembly, providing complete internal corrosion protection and extending service life.

**Precision-Engineered for Performance:** Manufactured to strict CEMA standards, Luff idlers feature very low Total Indicated Runout (TIR) for smoother operation and longer bearing life.

**Sealed to Withstand the Elements:** Our advanced polymer endcaps create a superior seal, shielding bearings from moisture, dust, and debris, reducing maintenance and unplanned downtime.

**Versatility Built In:** Available in 4", 5", and 6" diameters to suit a wide range of conveyor systems and load demands.

**High Moisture Seal  
Available**
