

CEMA F Idlers - 5600 Series

Built Tough for Demanding Applications: Engineered for high-load, high-impact environments, with oversized shafts turned down to 40mm for superior strength. Available in 5", 6", 7" and 8" diameters.

Enhanced Sealing Protection: Equipped with Luff's High Moisture Seal (HMS) and Anti-Lock Shield (SAL) as standard, preventing material buildup and guarding against moisture and contamination.

Durable Steel Construction: Features sealed-for-life 6308 bearings, a steel endcap, and a triple labyrinth seal system, delivering reliable, long-term performance with minimal maintenance.

Custom Solutions Available: Available in both standard and custom configurations to meet specific application needs.
