

Cambaroll

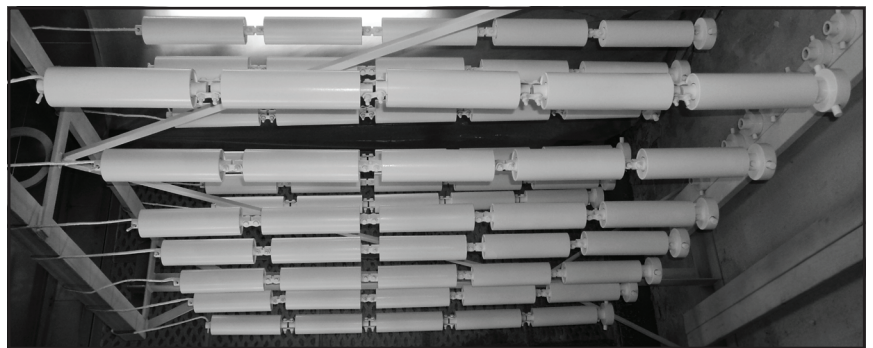

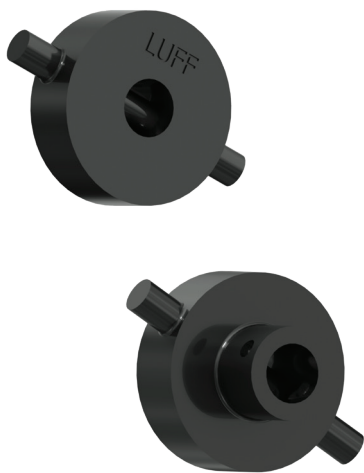

Maximize Performance with Easy Integration: Upgrade your conveying system without structural modifications. Luff retrofit solutions fit seamlessly into existing earlocks and brackets, no frame replacement required.

Built for Demanding Applications: Engineered to handle extreme loads and impacts, our assemblies deliver unmatched durability with 10 precision bearings in a 5-roll setup and 6 precision bearings in a 3-roll configuration.

OEM-Compatible Belt Profile: Designed to match the belt profile of OEM Limberroll systems for smooth and consistent material flow.

Enhanced Sealing and Bearing Protection: Equipped with Luff's Triple Labyrinth Seal and sealed-for-life bearings for maximum protection against contamination and reduced maintenance.

Versatile Mounting Options: Available in both Pin Style and Slot Style configurations, with compatible Return Rollers offered for complete system integration.

Return Rollers Available
