

## Ceramic Belt Cleaner

### Reliable, Long-Lasting Conveyor Cleaning Solution

Designed to tackle the toughest applications, it delivers long-term reliability and efficiency.

**Exceptional Cleaning Performance:** Effectively removes dry, block, wet, sticky, and high-temperature materials, keeping your system cleaner and reducing downtime.

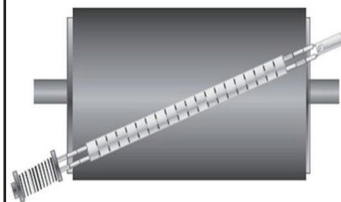

**Abrasion-Resistant Ceramic Tips:** Long-lasting blade edges resist wear, maintaining cleaning performance and minimizing the need for frequent replacements.

**Consistent Belt Contact:** Ceramic tips stay in close contact with the belt; even on worn belts or crowned pulleys, ensuring a more thorough clean.

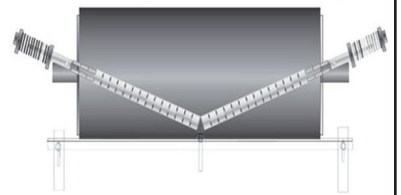

### Flexible Mounting Options

Two installation methods accommodate various pulley sizes. The V-type model is ideal for belts over 150 cm wide, enhancing cleaning coverage on larger systems.

A Cross-type Installation Method

### Easy Installation & Adjustment

Spring-tensioned holders simplify setup, while adjustable wires allow precise positioning of ceramic tips for optimal contact.
