

Quick Release Bracket

Quick Release Bracket for Garland Idlers

Rapid Disengagement: Effortlessly detach garland idlers from the beltline with the Quick Release Bracket; no tools or beltline stoppage required.

Minimized Downtime: Remove idlers while the conveyor runs and schedule replacements during planned maintenance, optimizing operational uptime.

Durable Cast Steel Construction: Robust suspension plate ensures smooth operation and eliminates binding during release, even in demanding environments.

Easy Integration: Now available for your existing garland idlers. Upgrade your system without major overhauls.
