

Retro-Protector Return Roller Guarding

Safety First: Acts as a basket to catch the roller in case of idler failure and eliminates all pinch points between belt and return roller to protect workers.

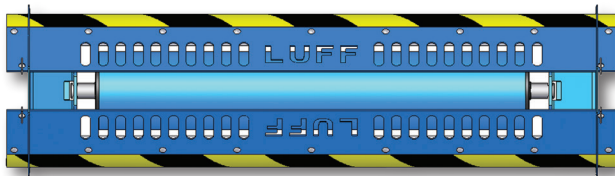

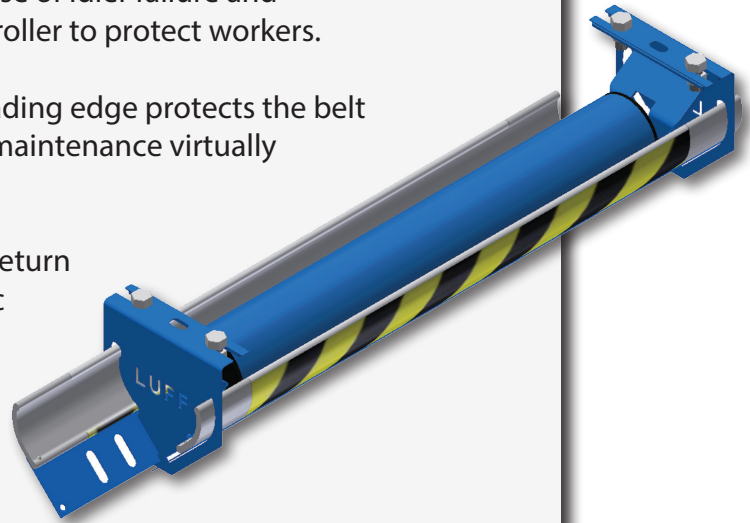

Durable, Low-Maintenance Design: Composite leading edge protects the belt from wear and abrasion; the Luff slide panels make maintenance virtually unnecessary.

Flexible Installation: Compatible with competitor return brackets and with steel, rubber disc, or urethane disc return rollers.

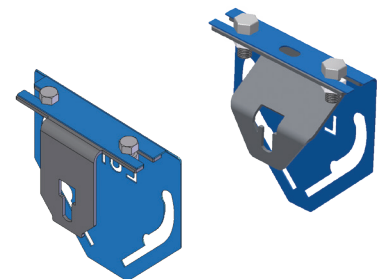

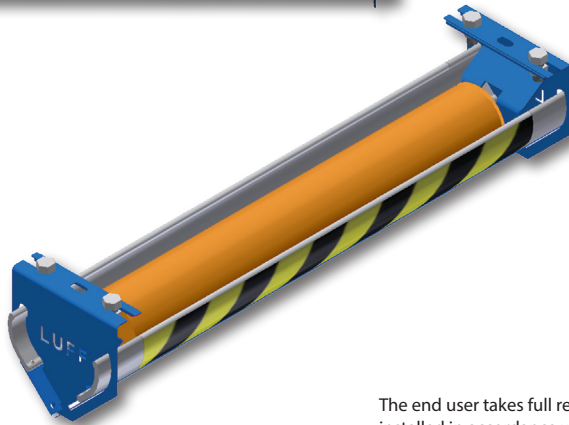

Enhanced Performance: Relief holes reduce material buildup. Optional Anti-lock Shield available for added roller protection.

Customizable Solutions: Custom designs available to meet unique operational requirements.

Standards Compliant: Meets MSHA, OSHA, and CSA specifications for safety and performance.
