

Return Roller Guarding

Engineered for safety. Built for durability. Designed for your operation.

Enhanced Safety & Compliance: Eliminates all pinch points between the belt and return roller, protecting workers and ensuring adherence to MSHA, OSHA, and CSA safety standards.

Extended Belt Life: Features a composite leading edge that minimizes wear and abrasion, significantly increasing belt longevity and reducing maintenance.

Versatile Fit: Available in both straight drop and belt saver offset designs to accommodate various belt sizes and application needs.

Optimize Performance: Choose from steel, rubber disc, or urethane disc rollers; each engineered for durability and site-specific conditions.

Reliable Operation: Optional anti-lock shield prevents roller seizure and system interruptions, promoting a continuous, smooth operation.

The end user takes full responsibility to ensure equipment or materials purchased are set up and installed in accordance with the Occupational Health and Safety (OH&S) Regulations, Acts, Code or Legislation for the jurisdiction in which these materials or equipment will be used. More information can be provided upon request.
