

## ***Rubber Bristle Brush***

**Superior Material Removal:** Durable rubber bristles deliver a powerful sweeping action to effectively remove debris and buildup from conveyor belts.

**Ideal for Specialized Belts:** Perfectly suited for cleated, chevron, and ribbed belts, where traditional scrapers may struggle.

**Enhanced Brushing Action:** Flexible rubber bristles provide a more aggressive cleaning performance compared to nylon brushes, without causing excessive wear on belt surfaces.

**Customizable Sizing:** Available to fit any belt width and diameter to match your system's specific requirements.

**Durable Bristle Design:** Features 2-inch long bristles for optimal cleaning contact and performance.
