

Solid Lube Bearings

Zero Grease. Zero Hassle.: Solid Lube Bearings are permanently lubricated, no re-greasing required. Cut out maintenance downtime and eliminate grease-related mess and costs.

Clean Equipment. Fast Washdowns.: Forget grease build-up. Our sealed design keeps things clean, cutting wash-down times in demanding environments.

Built to Block out Contaminants: From dust and debris to water and chemicals, solid lube technology seals out the elements and locks in performance.

Engineering for Longevity: Our micro-porous polymer matrix delivers consistent lubrication, extending bearing life and reducing replacement frequency.

Food-Safe & Industry Ready: USDA/FDA approved and HACCP-friendly, perfect for food-grade and sanitary operations.

All Weather Reliability: With a wide operating range of -55°F to 215°F (-48°C to 101.6°C), these bearings deliver smooth performance in tough environments.

Look for the SLB Mark.

Luff Idlers equipped with Solid Lube Bearings are clearly marked with SLB for quick and easy identification.
