

NAS Rollers

The North American Standard Roller redefines versatility and value, giving you the power to standardize across your operation without the cost of replacing all your existing frames.

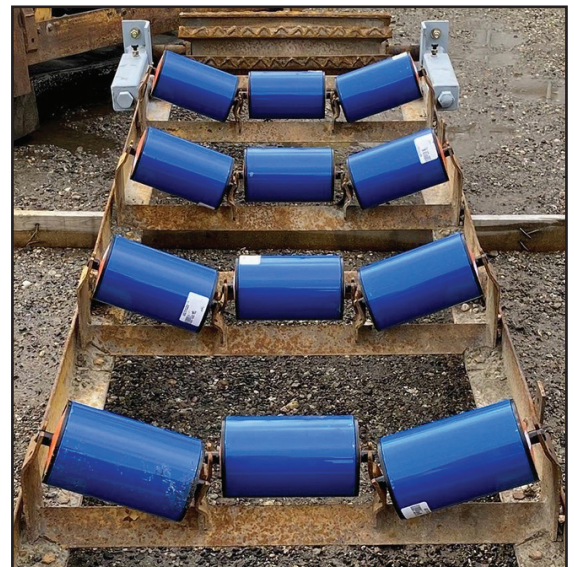

Universal Compatibility: Seamlessly integrates with existing frame setups, no need for full system replacements. Available in 5" CEMA C Steel Trough Rolls for 24" to 48" belt widths.

High-Quality Construction: Engineered to exceed industry expectations, the NAS Roller is manufactured with Luff's signature quality standards.

- » *Dipped Shell:* Corrosion-resistant design protects inside and out for long-lasting performance.
- » *Patented Polymer Endcaps:* Featuring a triple labyrinth seal for superior protection from contaminants.
- » *SKF Sealed-for-Life Ball Bearings:* Maintenance-free bearings ensure smooth operation and extended life.
- » 25mm shaft turned down to 20mm, paired with a 6205 bearing for optimal strength and flexibility.
- » *Optional:* Anti-Lock Shield and High Moisture Seal.
