

## ***Belt Brush Assembly - Shaft Mount Drive***

### **Efficient, Low-Maintenance Drive Design**

The shaft mount drive eliminates the need for external guarding, V-belt maintenance, and pinch points, creating a safer, cleaner, and more reliable system.

### **Compact and Easy to Install**

A space-saving design allows for effortless installation in tight or confined areas, ideal for retrofit or custom applications.

### **Durable, Maintenance-Free Performance**

Featuring a Dodge Tigear™ gearbox that's sealed for life, ensuring long-term reliability with zero maintenance required.

### **Fast and Simple Adjustments**

Crank-style tensioning makes brush adjustment quick and precise, minimizing downtime and keeping operations running smoothly.

### **Quick-Change Serviceability**

Removable ends provide easy access for bearing or brush replacement, while standard QD bushings ensure a secure, straightforward shaft connection.

### **Readily Available Replacement Parts**

Replacement brushes are stocked for quick delivery, keeping your system performing at peak efficiency with minimal interruption. Comes in both Nylon and Rubber bristles.
